SUMMARY

Cybersecurity undergraduate with hands-on experience in VAPT, network analysis. Completed internships involving vulnerability assessment and traffic analysis, along with practical exposure through CTF challenges and lab environments. Currently focused on strengthening skills in ethical hacking and web security

SKILLS

Programming: Python, C, SQL, Kotlin
Tools: Burp Suite, Android Studio
Platforms: Linux, Windows, MacOS
Concepts: Networking, VAPT, OWASP
Top 10, Operating Systems

PROJECTS

CASE MANAGEMENT DASHBOARD

[React.js, Python, PostgreSQL]

- Role-Based Access Control (RBAC) for secure case tracking.
- Multi-Factor Authentication (MFA) implementation.
- Automated status updates and rate-limiting.

MOOSIK STREAMING APP

[Kotlin, Jetpack Compose, Material 3, Media3, Room, Hilt, Retrofit]

- Visually stunning glassmorphic UI using Jetpack Compose.
- Real-time, synchronized lyrics (LRCLIB, Genius, YouTube).
- High-fidelity audio engine using Media3/ExoPlayer.

PNGTREE VAPT ASSESSMENT

[Burp Suite, subfinder, amass, dnsrecon, httpx, nmap, ffuf, nuclei, sqlmap]

- Discovered Critical Broken Object-Level Authorization (IDOR).
- Identified high-severity CSRF token bypass enabling cross-session request forgery.
- Uncovered insufficient authentication attack protections missing rate-limiting on login endpoints.

HOME LAB SETUP

[Lenovo Hardware, Tailscale, SSH, React]

- Secure Authentication System guarding the dashboard interface.
- Real-time System Analytics featuring live CPU/RAM metrics and a streaming log console.
- Advanced File Browser with nested directories, context menus, and a

PRACTICAL EXPERIENCE

INTERN AT CYBER CRIME WING TAMIL NADU POLICE, CHENNAI

Duration: 1/06/2026 —————> 31/07/2026

- Developed a real-time crime case handling dashboard used to manage the full case flow – creating, altering, and updating case details
- Built with React.js for the frontend and Python for automation, enabling timely status updates
- Implemented Role-Based Access Control (RBAC) to manage permissions across user roles
- Added security features including Multi-Factor Authentication (MFA) and rate-limiting
- Gained hands-on experience with how real cyber-crime cases are handled and processed during the internship

ASCIZEN ACADEMY VULNERABILITY ASSESSMENT & PENETRATION TESTING INTERN, CHENNAI

Duration: 1/03/2026 —————>

- Applied OWASP Top 10 methodology across real-world web targets
- Practiced network enumeration, Linux-based tooling, and CTF-driven exploit techniques
- Documented findings using professional VAPT reporting standards

EDUCATION

B.E Computer Science Engineering 2024-2028 [Cyber Security]

Dhanalakshmi Srinivasan College Of Engineering And Technology, Mamallapuram

Higher Secondary Education 2021-2023

National Matriculation Higher Secondary School
